Source SVG/text aids, not verified native PDFs or a printer-tested edition. SVGs request an ordinary local sans-serif font; no font file, third-party art or remote image bundled. No actual child work, reply, permission or audience encounter supplied. Text alternatives keep the same fields and add a grown-up attribution note. A plan is not performed puppetry. Full separate item/source terms (../../source/SOURCE-AND-RIGHTS.md) accompany every selected set.
