A-first — Cloud shelter model

One separately selected formative source · primary · first. The educator chooses this source and its own blank; this is not a daily class worksheet quota.

Before opening: Capture this selected first response before keys, worked models, feedback or its later source. Record prior exposure and usual/neutral supports; if already exposed, label it exposed and choose an unused reserve if suitable.

Complete supplied source

Invented Cloud shelter description, not a local place. View from its marked lower-left front corner. A naturally formed rock mound is at the upper right. A deliberately planted and tended moss tray is at the lower left. A built roof token is at the upper left. The source says nothing about actual weather, visitors, distances, compass orientation or cultural meaning.

Your four source questions

1. Choose one feature and show where this source places it, naming the viewpoint or relation.

2. Make your own labelled record/model or exact account for two chosen features, using this source and an agreed meaning key.

3. Give a useful feature description for one chosen feature and point to the source detail supporting it; unknown or multiple aspects are allowed when explained by the source.

4. Ask one question this source makes you want to investigate; name one thing it does not establish.

This source's own blank (blank.html) — use only A-first, with these questions. Usual communication, exact neutral reading, drawing/large or tactile marks and wanted child-directed writing/operation are available. Record source/access/helper support separately. No personal family/history, outing, performance or actual-place alteration. Stop, private and not yet observed remain valid.

Reuse: Original SubjectNest source/questions/blank © NeuroForgeIO Pty Ltd 2026, CC BY 4.0, credit and changes. Whole notice (../../../source/SOURCE-AND-RIGHTS.md); actual learner work is separate.
