Make a little place guide

What would you like someone to find?

1. Choose a pretend place, a safe model, or a place your grown-up has checked.

2. Make a feature with paper, a drawing, your usual words/signs/AAC, or a wanted helper. Say what your marks mean.

3. Tell us which source helped. A pretend source stays pretend.

4. Try finding one thing from a chosen starting view. You can try yourself, ask someone who wants to help, or leave it for later.

5. Keep it, change a bit, or stop. Say what actually happened if you tried.

You can keep your work private. You do not need a screen, tidy handwriting, a family story or a long explanation. A helper can move/write exactly what you ask; your idea still belongs to you. Ask before someone else's turn. No real place gets changed just because we changed a paper model.

Start with the original Sprout Yard source (ordinary-sources.html) · my own guide record (own-guide.html) · paper or local device (board-setup.html).
