a-first · Paper-window motifs

Read, draw, say, sign or direct. One useful part can be enough.

HELD · Original pretend question: which ONE paper-window motifs option would you choose? Options, in order: arch, square, wave. Available replies in order: arch, square, arch, wave, arch, square. Eight fictional invitations; six available choices; two no available replies, reason and preference unknown. Each available reply is one choice. No actual survey, visit or child result is supplied.

Your own first idea. Read, point, draw, sign, type or direct; pause/private access is welcome. No solved answer is supplied.

1. Make or direct a complete list of the available replies. Keep the unavailable replies separate.

2. Make or direct a table showing each named option and its recorded count.

3. Which option has most recorded choices? Compare it with the second option in the source option order. How many more? What do the unavailable replies tell us?

4. Make, describe or direct one useful statement or sign for this pretend choice. Explain what it helps and what stays unknown.
