H03 · Your useful table

Try together: Make a table for fictional triangle,circle,triangle,circle,triangle. Intended categories triangle/circle/square:3/2/0. Child chooses a title and points to one count. An omitted square row is not proof of zero; include it. No printer/returned sheet.

What this practises: A labelled frequency table. Keep actual child choices and adult handling/help separate. A few minutes or one question can be enough. No purchase, public sharing, personal information or returned activity is required.
