A kit you can keep small

Paper, words and usual communication are enough for the supplied routes. For wanted real measurement use a checked familiar labelled ruler, stable scale and unbreakable measuring jug, safe light familiar objects, an uncluttered suitable surface and responsible adult review. No purchase, printer, account, body data, outside asset or trip is required. Use safe large paper pieces for a collection. No exact quantities of real kit are assumed.

Ordinary printable/editable SVGs and complete words are in the aid menu. Blank paper can reproduce each empty response field. Model cards are labelled and filled; own fields are genuinely empty. Full rights are at the adult rights door; later print/PDF production must check actual font rights and physical scaling rather than infer them from an SVG.
