# Pick one useful little job

Try one. You can talk, draw, sign, type, point or ask someone to write your words.

- Make a bookmark fit
- Choose a container
- Guess with a clue
- Catch an answer that looks wrong
- Your own empty measurement card · all its words
- Your own empty estimate card · all its words

Ask a helper to read or describe anything you want. You can direct the helper, use a model, take a break, keep your response private or stop. Real tools and making need an adult's suitable setup first. A model is someone else's example; your blank card is for your own idea.
