01 · Mark laboratory

Choose a line or gap for an own idea. Usual tools or exact directions are enough.

Source facts: original AI-assisted digital teaching art, NeuroForgeIO Pty Ltd,2026. Different supported readings are welcome.

A · Room for a pause

Your own trial / exact directions

A literal source: On a white background, three equal rounded rectangular outlines form a vertical group on the left. A thin continuous line starts on the right edge of the middle rectangle, curves through the open centre and ends before a circle on the right. The circle has a heavier outline. A visible gap separates the line endpoint and the circle. All shapes are unfilled; there is no arrow or person.

Try two line treatments in the blank frame or on scrap. Keep a first trial, then choose a relation for your purpose.

A described change stays a plan until made; credit the actual operator separately.

My chosen idea / relation:

Actual trial and material/tool/operator:

What I would keep or change, and why:
