02 · Scale and overlap

Choose what should be prominent, or choose equal attention.

Source facts: original AI-assisted digital teaching art, NeuroForgeIO Pty Ltd,2026. Different supported readings are welcome.

B · The unexpected visitor

Your own trial / exact directions

B literal source: On a white background, four equal rounded rectangular outlines form an evenly spaced horizontal row near the bottom. One larger outlined triangle sits above the row. Its outline is heavier than the rectangles. A thin diagonal rises from left to right behind the triangle; the triangle's white interior hides the intersecting part. The line does not pass through the rectangles. No arrow or person appears.

Try a scale choice, or deliberately omit a represented hidden rear edge in a pencil drawing: front shape first, then visible back edges. Reverse roles in another version. Optional available erasure is another representation.

Complete pencil outlines alone keep both lines visible. Opaque paper/white-filled digital layering actually covers an edge; name that different process/operator.

My purpose and chosen change:

Actual versus represented edge / operator:
