Held F · Pretend packet score

HELD: first own response before help/key

Entirely fictional tokens, not real ranking or allocation.

Start total 2. For each input: < 3 add 1; otherwise < 6 add 2; else add 4.

New batch [1, 4, 7]. Changed boundary batch [3, 6]; empty batch [].

Criteria: start once; every record; one outcome each; final total visible.

Generate/compare an own design. With approved access create/run it.

Inspect input, branch and before/after total. Test changed input.

One meaningful first component before help; continue another sitting.

First own design

_____

My useful test / prediction

_____

Actual run / help / next choice

_____

Original fictional teaching model · no child/user trial or real allocation claim
