A4 · Fairer plan and repeating record

Original ordinary model · choose one useful question or representation

Setup 1	Setup 2
Taller at start	Smaller at start
Big pot	Little pot
Shaded position	Brighter position
80 mL water daily	20 mL water daily

Start size, container, water and position differ. No outcome exists. Choose one useful repair before any proposal is reviewed.

Paper plans do not grant permission. Future outcome rows remain not observed. No living things need changing.

A4 · Fairer plan and repeating record

Your choices · optional own paper, words, sign, AAC or exact scribing

Question / changed condition

Measured quantity / controls / other-condition log

Sample / schedule / reference / risk and permission review

A4 · Fairer plan and repeating record

Six blank future rows · planned only; never invented data

Row 1: identifier / day-time / height / alive / deviation

Row 2: identifier / day-time / height / alive / deviation

Row 3: identifier / day-time / height / alive / deviation

Row 4: identifier / day-time / height / alive / deviation

Row 5: identifier / day-time / height / alive / deviation

Row 6: identifier / day-time / height / alive / deviation

Use own continuation rows if needed. All unperformed outcomes: not observed.

A4 · Fairer plan and repeating record

Complete source · use one useful part in your usual communication

Choose a useful job

Choose one flaw in O3 and make a fairer paper proposal. State the question, changed condition, measured height/alive quantity, features kept alike, other conditions to record, sample/identifier, day/time/reference, deviations and review/permission needed. Outcomes remain not observed.

One route investigates assigned light position with comparable species/stage/container/mix/water schedule/check times, while recording temperature/moisture. Shade can change temperature too: more design review is still needed. Another route plans Day 0/3/6 checks at the same daily time with six identifiers per group and separate height/alive records. Six blank future rows are a plan, not actual results.

No collecting unknown plants, salt treatments or public child images. A supplied record or an adult-reviewed non-invasive proposal is the alternative. Do not collect, move, shade, water or alter living things to complete this paper job. A risk/permission request is not granted permission.

Complete ordinary source

O3 · A plan that changes too much

Another fictional team proposes: “Put one tall bean seedling in a big shaded pot with 80 mL of water daily. Put one smaller bean seedling in a little brighter pot with 20 mL daily. After a week, whichever is tallest proves whether shade is good.”

No outcome exists. Starting height, pot size, water and position differ. “Tallest at the end” would also ignore the different starting heights. A revised plan can be useful; it is not a conducted investigation or permission to run one.

A4 · Fairer plan and repeating record

Complete source · use one useful part in your usual communication · continued

Use these full words and source tables on scrap paper, an exact read-aloud, sign/AAC or learner-directed marks. No diagram hides extra data. Original diagram descriptions and all labels accompany the complete generated text alternative. Blank areas can be replaced by any amount of own paper; no neatness, handling or writing speed requirement. These are supplied/model jobs, not a completed plant investigation.
